

Amendments to the Claims:

This listing of the claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-57. (Cancelled)

58. (Currently Amended) A communication terminal comprising:

a first wireless communication section ~~operable to receive~~ that receives, from ~~[[an]]~~ other terminal within a distance for communicating with said communication terminal, ~~said information for starting including a communication with the other terminal method for a~~ second wireless communication section; and

a second wireless communication section ~~operable to establish~~ that establishes a communication session using said information received via said first wireless communication section.

59. (Currently Amended) The communication terminal according to claim 58, wherein said information for starting communication with said other terminal ~~[[is]]~~ further includes identification information.

60. (Currently Amended) The communication terminal according to claim 59, further comprising:

an authentication section ~~operable to authenticate~~ that authenticates with said other terminal using said identification information;

wherein said second wireless communication section ~~is operable to establish~~
establishes a communication session using said identification information when said
authentication section authenticates with said other terminal successfully.

61. (Currently Amended) The communication terminal according to claim 58,
wherein said ~~second~~ first wireless communication section has directivity.

62. (Cancelled)

63. (Currently Amended) A communication terminal comprising:
a first wireless communication section ~~operable to transmit that transmits~~, to
[[an]] other terminal within a distance for communicating with said communication terminal,
information for starting communication with the other terminal, and receives from said other
terminal a message indicating a communication method; and

a second wireless communication section ~~operable to establish~~ that establishes a
communication session using said information in response to a communication establishment
request from said other terminal.

64. (Currently Amended) The communication terminal according to claim 63,
wherein said information [[is]] further includes identification information.

65. (Currently Amended) The communication terminal according to claim 64,
further comprising:

an authentication section ~~operable to authenticate~~ that authenticates with said
other terminal using identification information in response to a communication establishment
request from said other terminal;

wherein said second wireless communication section ~~is operable to establish~~
establishes a communication session using said identification information when said
authentication section authenticates with said other terminal successfully.

66. (Currently Amended) The communication terminal according to claim 63,
wherein said ~~second~~ first wireless communication section has directivity.

67-82. (Cancelled)
